

Fully automatic anti-decubitus air mattress

Product Description

The air pump adopts electromagnetic vibration type

It has the characteristics of high efficiency, low consumption, low noise and long-term stable operation, and is currently the product for the treatment of patients with bedsores.

24 air bags

Easy to clean, reduce bacteria and facilitate maintenance and replacement. Jet B, It is specially designed for the prevention and treatment of bedsores for long-term bedridden patients. There are many micro-holes on the surface of the air cushion, which can eject a small amount of air to reduce the humidity around the patient's body and keep the skin dry. The air cushion is inflated by the air pump and supports the patient's body softly and flows. The air can also prevent the reproduction of pus bacteria, so as to prevent and treat bedsores.
